To collect, sort, and process waste into a material that can be manufactured into a new product.

Recycling is good for UNCC because...??

Legal & Organizational Requirements

NC General Statutes:

- ban certain materials from the landfill.
- require that recycling be easily accessible to all State employees in buildings occupied by State agencies.
- Mecklenburg County Business
 Recycling Ordinance bans Cardboard and
 Office Paper from the landfill.
- UNC System "Sustainability Policy" requires that we work towards a "zero-waste" campus.
- UNC Charlotte Policy 110 makes all members of the University responsible for reducing the University's trash through waste reduction, reuse, and recycling.

BANNED ITEMS:

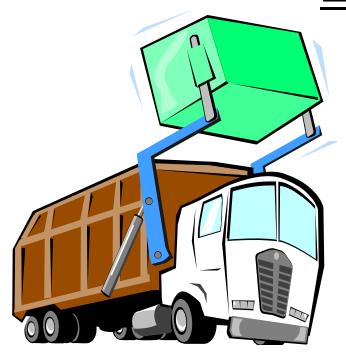

Aluminum Cans
Antifreeze
Cardboard
Lead-acid Batteries
Motor Oil
Office Paper
Plastic Bottles
Tires
White Goods
Wooden Pallets
Yard Waste

TVs & Computer

Monitors will join the

list in 2011

Economics

every MONTH, we pay

~\$21,000

to have our trash picked up and removed from campus

Depending on the material, our recycling costs range from:

- completely free (metal, pallets)
- a haul/pick up cost only; no tipping fee (concrete, paper, drink containers)
- or a hauling cost with a reduced tipping fee (yard waste \$16.50/ton vs. \$44/ton)

Environmental & Social

This is the warm fuzzy part that can't be measured. At a minimum, recycling helps the University:

- Avoid fines from improper management and disposal of materials
- Avoid negative PR from improper management and disposal of materials
- Get good PR for doing the right thing
- Make our student body happy
- Potentially attract more students/staff/faculty

The Rules of Recycling

- SOMEBODY can take almost ANYTHING, as long as you:
 - have enough to make it worthwhile (dumpster loads are okay if you have them regularly; infrequent loads generally need to be tractortrailer sized)
 - can get the material to them
- The cleaner the material is, the easier it is (ie: the less it costs) to recycle
 - less time & energy spent sorting
 - less damage done to processing equipment (balers, shredders, etc.)
 - fewer chances for imperfections in end product

You can help by making sure your recyclables are in the right bin.

What are We Recycling?

Automotive Fluids (Antifreeze, Diesel Fuels, Motor Oil)

Batteries (Automotive, Household, Rechargeable)

Cafeteria/Dining Waste (Cooking Oil, Edible Food, Compostable Food Waste)

Chemicals & Hazardous Waste (Oil Filters, Paint, Refrigerants, Solvents)

C&D Materials (Asphalt, Concrete, Untreated Drywall, Untreated Lumber)

Computer-Related Items (Inkjet & Toner Cartridges, CDs, Disks)

Drink Containers (Aluminum Cans, Glass Bottles, Plastic Bottles, Steel Cans)

Educational Materials (Microfiche, Transparencies, Videotapes)

Fluorescent Bulbs & Ballasts

Other (Six-Pack Rings, Tires, Tyvek Garments)

Packing Materials (Peanuts, Block Styrofoam)

Paper (Books, Cardboard, Office Paper, Newspaper, Paperboard, etc.)

Reusable Stuff (Reusable Office/School Supplies; Clothes, Food, etc. from Move-out)

Scrap Metal (including Copper Wire and White Goods)

Wood Waste (Pallets, Yard Waste)

Campus Outreach & Education

- Coordinate meetings for Keep Charlotte Green and advise student groups.
- Sponsor bi-annual campus cleanups.
- Coordinate yearly "Earth Day" celebration.
- Hold education sessions throughout the year for faculty, staff, and students.
- Participate in SOAR and EXPLORE UNC Charlotte (programs for prospective and incoming students).
- Participate in campus events (Rec Fest, etc.)
- Give programs and tours to classes, student groups, and "Camps on Campus".
- Offer "Take It or Leave It" weekly (weather permitting).

Academic Recycling

Recycling Staff collects several materials from inside the academic/support buildings and loading docks, including:

- Aluminum Cans
- Batteries
- Cardboard
- Glass & Plastic Bottles
- Inkjet & Toner Cartridges

- News Blend
- Office Paper
- Reusable Office Supplies
- Styrofoam

These materials are then taken to the proper locations for vendor pick up.

Paper Collection

- "Office Blend" bins are emptied into 96-gallon toters, which are then swapped out as needed by the contractor. Paper is taken back to their warehouse, where it is baled and shipped back to paper mills.
- "News Blend" is loaded into our residence hall recycling bins, where it is hauled to a processing facility that turns it into insulation.
- Cardboard is placed into 8-yd cardboard recycling bins which are emptied twice per week by our contractor and hauled to

International Paper.

"News Blend" is recycled into insulation

"Office Blend" is recycled back into office/copy paper or may be "down-cycled" into catalogs, magazines, and newspaper.

Cardboard is recycled back into brown kraft paper or boxboard.

Co-mingled Drink Containers

Drink containers are taken to one of the 30-yd covered rolloffs located outside the residence halls. Full rolloffs are hauled to FCR, a processing facility where materials are sorted, baled, and shipped to processors.

Plastic is sorted by type, washed, ground into flakes, and reprocessed into a wide variety of materials.

Metal is sorted by type, melted, and re-processed into a wide variety of materials. Nearly all metal ems are made with recycled content.

Facilities Management Recycling

In addition to the normal materials recycled on campus, FM recycles **motor** oil, ballasts, tires, automotive batteries, fluorescent bulbs, scrap metal, solvents, refrigerants, paint, electrical wiring, pallets, yard waste, and some types of construction/demolition debris.

Strategy: 1.2 Improve Logistics Efficiency
Objective: 1.2.1 Improve Stock Fill Rate to 97%

ACTION PLAN

Actions Complete

- 1 SDI's automated inventory management system which automatically computes stocking levels and reorder points based on usage and replenishment time was on the entire quarter.
- 2 Ensured all items which had backorders placed against them were turned on for replenishment. This was a contributing factor to late deliveries and lower fill rates the first quarter of FY10. This quarter replenishment was on the entire period and fill rates have improved.

Actions Planned

1 – Continue to let automated system control and see how it works.

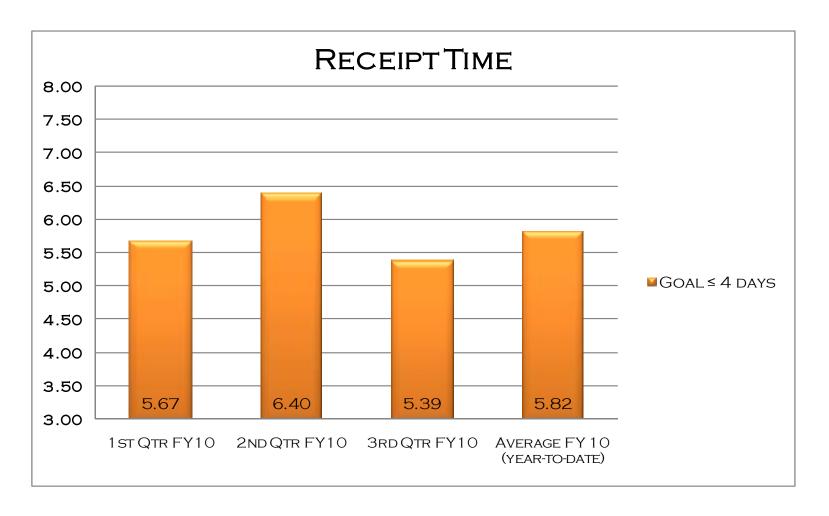

GOAL #1 – Improve Maintenance and Operations of the Campus

Strategy: 1.2 Improve Logistics Efficiency

Objective: 1.2.2 Reduce Average Non-stock Requisition to Receipt Time to 4.0 Days

Measure: Days (SDI's KPI – Non-stock Requisition to Receipt Time)

Goal: Less than 4 days

Lead M. & O.

Strategy: 1.2 Improve Logistics Efficiency

Objective: 1.2.2 Reduce Average Non-stock Requisition to Receipt Time to 4.0 Days

ACTION PLAN

Actions Complete

- 1 Supervisors improved average approval time from 7.5 hrs. in Qtr 2 to 7.37 hrs. in Qtr 3.
- 2 Information to buyers at SDI back-tracked from 2.1% of requests needing information in Qtr 2 to 0.8% in Qtr 3.
- 3 Reviewed non-stock orders to determine items that should be stocked. Monthly non-stock orders averaged 292 for all of FY09. Despite tight budget; the average monthly non-stock orders this fiscal year has averaged 417 per month. The 33% increase has strained SDI's resources.

Actions Planned

- 1 Encourage all employees and supervisors to review orders and stop ordering as nonstock materials which are stocked in the warehouse.
- 2 SDI has already added additional resources on their end to help with higher volumes.
