

**CID Roadway Improvements
RFP Questions & Responses
Capital Project Code 41226, Item 301A
August 23, 2012**

1. Can you confirm the schedule for the project?

The section under SCHEDULE in the RFP should read as follows:

”The designer must be able to complete all requirements of the contract and complete the Advance Planning for this project prior to November 22, 2012 in accordance with the planned start of construction on December 1, 2013.”

2. The University’s submittal page contains engineering disciplines not typically associated with a roadway project. Is it permissible to change these names (mechanical, plumbing, mechanical, RCDD) to those associated with this specific project (utility engineer, traffic engineer, roadway design engineer, etc.)?

The form included is a standard form. Not all disciplines listed apply. If you wish to modify the form for inclusion of other consultants, feel free to do so.

3. Are you proposing to install both roundabouts on Craver (from the traffic study) in front of the student union?

This project will not include either roundabout on Craver Road and will focus instead on pedestrian improvements.

4. 50 pages on the proposal – does a double-side-printed sheet count as one or two pages? Please confirm.

A double-sided printed sheet is two pages. After creating your digital submittal, open the pdf and look at the number of pages for an accurate count.
