PROJECT: **UNC Charlotte**  
**Robinson Humidity and Boiler Replacement**  
**Design Services**  
**Code: 42526 Item 331**

Thank you for your interest in the subject project. This information is being provided to all firms which express an interest in the design of the project. Limit the size of your submittal document to no greater than 12½ inches in height and 9½ inches in width **maximum 30 pages – including standard forms**. Submittals are due in my office by 2:00 p.m. **April 30, 2026**. Do not transmit any submittal information via email.

Submittals **must** include the cover sheet, Sections I and II of the Standard Form 330, the Designer's Supplemental Information Form, along with any additional information considered appropriate. Please deliver one copy of the submittal, along with **one** electronic copy in pdf format USB to my office at the address noted above. Each hard copy should be bound together as a document, and the digital submission should be assembled into a single file.

All submittals will be reviewed by the University Designer Evaluation Committee. The preliminary evaluation process will be completed in early **May of 2026** and firms selected for interviews will be notified at that time.

Any submittals delivered by courier should be delivered to the address written above. All hand delivered submittals should be delivered to the address written above and placed in the brown bid/proposals drop box located in the 1st floor lobby of FMPPS building 55. Any questions about the project should be directed via email to Bill Finley at [wfinley@charlotte.edu](mailto:wfinley@charlotte.edu). Please do not contact other UNC Charlotte staff.

Sincerely,

LaKeya Hewlin

*Drop Box for Proposals*

The University of North Carolina at Charlotte  
**Robinson Humidity and Boiler Replacement**  
Design Services  
Code: 42526 Item 331

This project will perform work on existing HVAC systems in Robinson Hall to control humidity in critical spaces. The majority of this building's systems are original and have surpassed their expected life cycle. Airflow monitoring to be added to buildings AHUs throughout in addition, this project will replace end of life boilers, including one currently leaking. This will improve the building's ability to provide heating to the building. It will also include a full TAB of the building.

Manufacturer teardown/service of both chillers and vav box controller replacements.

**Controls**

1. Reprogram AHU controllers for building pressurization control.
2. Replace sensors, flow meters. Original valves and actuators.
3. VAV box controller replacements.

**Mechanical**

1. Replacement of the building boilers.
2. Add outdoor air flow monitoring and building pressure control.
3. Address humidity control issues in the building.
4. Manufacturer teardown/service of both chillers.

**EXPECTATIONS OF THE DESIGNER:**

The Design team must include professionals who can demonstrate high standards of accomplishments and knowledge in the following areas:

- North Carolina State Construction Office and Department of Insurance requirements and procedures.
- Demonstrated experience with direct-digital control, building control sensors, variable frequency drives and sequence of operations design.
- Humidity Control used in HVAC systems
- HVAC Mechanical Systems used in academic buildings
- Success in working with other required disciplines for project design deliverables.

**SCOPE OF WORK:**

The Designer shall be responsible for, but not limited to, the following items:

- Review all data furnished by the University including existing building documents, reports and records of the existing HVAC and controls.
- Meet with University Engineering and Maintenance Operations Department to review design requirements and expectation for the project success.
- Prepare SD/DD and CD plans and specifications in accordance with the NC SCO

- requirements.
- Provide bidding, contracting assistance and construction administration services.

## **DESIGNER SELECTION CRITERIA**

As detailed in the North Carolina Administrative Code (01 NCAC 30D .0303), the University's Design Selection Committee will use the following in evaluating qualifications:

- (1) Specialized or appropriate expertise in the type of project.
- (2) Past performance on similar projects.
- (3) Adequate staff for the proposed project design team.
- (4) Current workload and State projects awarded.
- (5) Proposed design approach for the project.
- (6) Recent experience with project costs and schedules.
- (7) Construction administration capabilities.
- (8) Proximity to and familiarity with the area where project is located.
- (9) Record of successfully completed projects without major legal or technical problems.
- (10) Other factors that may be appropriate for the project.

## **SCHEDULE:**

The designer must be able to complete all requirements of the contract and complete the Construction Document submission for this project in **December 2026**.

## **BUDGET:**

The total budget for this project is \$1,200,000, which must provide for design support services, design fees, Construction Administration, and construction of the project scope described above.

This sheet is to be the cover sheet for the submittal. If the submittal is bound in a binder, this will be the top sheet visible upon opening the binder cover.
